THE GLOBAL PROSTATE CANCER MEETING
“Hot Spots in Prostate Cancer”

SEPTEMBER 15-16, 2016 • MADRID. HOTEL NH EUROBUILDING

Organizers:
The Global Prostate Cancer Meeting will be organized in 4 AREAS OF KNOWLEDGE:

1. DIAGNOSIS & MANAGEMENT OF CLINICALLY LOCALIZED PROSTATE CANCER. WHERE ARE WE GOING?
   - mpMRI of the Prostate, Update on reporting mpMRI findings, Fusion guided biopsy, active surveillance, focal therapy, radical surgery and others.

2. LOCALLY ADVANCED & M0/M1 HORMONESENSITIVE (HS) AND HORMORESISTANT (HR) PROSTATE CANCER: QUO VADIS 2016?
   - High risk PC management, Failure after radical & focal therapy, New development & long-term outcomes in Hormonotherapy, Chemotherapy in real life and Immunotherapy awakening and other strategies.

3. SEXUAL DYSFUNCTION AFTER RADICAL PELVIC SURGERY: FROM BASIC SCIENCE TO CLINICAL PRACTICE.
   - Incidence & Prevalence Challenging cases-operative technique.

4. MALE URINARY INCONTINENCE AFTER PROSTATE CANCER TREATMENTS.
Thursday September 15, 2016 (08:30 - 19:30)

**Diagnosis & Management of Clinically Localized Prostate Cancer. Where are we going?**

mpMRI of the Prostate, Update on reporting mpMRI findings, Fusion guided biopsy, active surveillance, focal therapy, radical surgery and others.

**Lectures**
- Overdiagnosis, overtreatment and re-treatment: What exactly means in 2016?
- How to interpret biology of localized PC: Clinical implications, heterogeneity, genomics and others.
- MRI as a screening tool for PC: “Fusion or Confusion”.
- ProAD 2.0 How to report and how to draw clinical translation.
- Prostate biopsy: To whom and how: Fusion, No-fusion (cognitive), standard.
- Active Surveillance: Long-term outcome and follow-up criteria.
- Focal Therapy: State of the art (HIFU, CRU, Nanoknife, etc).
- Radical Treatment: Oncological & functional outcomes after 30 years perspective.
- Role of hormonal neoadjuvant regimens: Time to rethinking?

**Live Demonstrations**
- Fusion guided biopsy: MIM Symphony, Biopsee, Hitachi, BK Medical, Artemis, UroNav.
- Focal Therapy: Focal HIFU, Focal Cryo and Nanoknife.

Friday September 16, 2016 (08:30 - 19:30)

**Sexual Dysfunction after Radical Pelvic Surgery: From Basic Science to Clinical Practice.**

Incidence & Prevalence, Challenging cases, operative technique.

**Lectures**
- Role of PET-CT in disease evaluation & follow-up.
- Salvage lymphadenectomy: Indications & outcomes.
- Failure after radical therapy: Adjuvant or Salvage Radiotherapy, hormones, Whole gland Cryo or HIFU, Radical Prostatectomy.
- Failure after focal therapy: radical prostatectomy, external beam radiotherapy, other options.
- What means hormonal resistance to androgen blockade?: An holistic vision.
- Current indications for chemotherapy in advanced prostate cancer and in “real life” clinical practice.
- Long-term results of estradioligenesis manipulation in CRPC.
- Androgen receptor as therapeutic target in CRPC.
- Implications of bone metabolism in CRPC.
- Development and current status of new therapeutic options in CRPC (Immunotherapy, PRAP, PI3K Pathway, AKY, MDTR, HDAC...)

**Live Demonstrations**
- Fusion guided biopsy: MIM Symphony, Biopsee, Hitachi, BK Medical, Artemis, UroNav.
- Focal Therapy: Focal HIFU, Focal Cryo and Nanoknife.

**Locally Advanced & No/No HormoneSensitive (NS) and HormoneResistant (HR) Prostate Cancer: Quo Vadis 2016?**

High risk PC management, Failure after radical & focal therapy, New development & long-term outcomes in Hormonotherapy, Chemotherapy in real life and Immunotherapy awakening and other strategies.

**Lectures**
- Oligometastatic disease definition & role of radical surgery.
- Outcomes of multimodal strategies in High Risk PC.

**Male Urinary Incontinence after Prostate Cancer Treatments.**

**Lectures**
- Re-operative Prosthetic Surgery.
- Re-operative Prosthetic Surgery for Sphincter Weakness Incontinence.
- Re-operative Prosthetic Surgery for Erectile Dysfunction.

**Debates & Clinical Cases**
- Is there a New Paradigm for the Cause and Management of Incontinence Following Radical Prostatectomy.
- Male Urinary Incontinence - Management Options and Complications of the Artificial Urinary Sphincter.
- Penile Prosthesis & Peyronie’s Disease 2016 Update.
- New Strategies to increase patient satisfaction after IPP: Meeting patient’s expectations.
- Genital Prosthetic Surgery Market: USA & Europe, Why are so different?

**Videos**
- Mini-invasive and no-touch techniques
- Grafting procedure
- Prosthetic Urology
- Management of Complications

**Debates & Clinical Cases**
- The faculty will present difficult cases for discussion.
- The attendees may also bring clinical cases and controversies they would like to be discussed.
THE GLOBAL PROSTATE CANCER MEETING
“Hot Spots in Prostate Cancer”

THURSDAY SEPTEMBER 15, 2016 (08:30 - 19:30)

DIAGNOSIS & MANAGEMENT OF CLINICALLY LOCALIZED PROSTATE CANCER: WHERE ARE WE GOING?
mpMRI of the Prostate, Update on reporting mpMRI findings, Fusion guided biopsy, active surveillance, focal therapy, radical surgery and others.

LECTURES
- Overdiagnosis, overtreatment and re-treatment: What exactly means in 2016?
- How to interpret biology of localized PC: Clinical implications, heterogeneity, genomics and others.
- MRI as a screening tools for PC: “Fusion or Confusion”.
- PRAD 2.0: How to report and how to draw clinical translation.
- Prostate biopsy: To whom and how: Fusion, No-fusion (cognitive), standard.
- Active Surveillance: Long-term outcome and follow-up criteria.
- Focal Therapy: State of the Art (HIFU, CR0, Nanoknife, etc).
- Radical Treatment: Oncological & functional outcomes after 30 years perspective.
- Role of hormonal neoadjuvant regimens: Time to rethinking?

LIVE DEMONSTRATIONS
Fusion guided biopsy: MIM Symphony, Biopsee, Hitachi, BK Medical, Artemis, UroNav.
Focal Therapy: Focal HIFU, Focal Cryo and Nanoknife.

FRIDAY SEPTEMBER 16, 2016 (08:30 - 19:30)

SEXUAL DYSFUNCTION AFTER RADICAL PELVIC SURGERY: FROM BASIC SCIENCE TO CLINICAL PRACTICE
Incidence & Prevalence Challenging cases-operative technique

LECTURES
- Role of PET-CT in disease evaluation & follow-up.
- Salvage lymphadenectomy: Indications & outcomes.
- Failure after radical therapy: Adjuvant or Salvage Radiotherapy, hormones, Whole gland Cryo or HIFU, Radical Prostatectomy.
- Failure after focal therapy: radical prostatectomy, external beam radiotherapy, other options.
- What means hormonal resistance to androgen blockade?: An holistic vision.
- Current indications for chemotherapy in advanced prostate cancer and in “real life” clinical practice.
- Long-term results of androgen deprivation manipulation in CRPC.
- Androgen receptor as therapeutic target in CRPC.
- Implications of bone metabolism in CRPC.
- Development and current status of new therapeutic options in CRPC (Immunotherapy, PRAP, PI3K Pathway, AKY, M0TR, HDAC...)

MALE URINARY INCONTINENCE AFTER PROSTATE CANCER TREATMENTS.

LECTURES
- Re-operative Prosthetic Surgery.
- Re-operative Prosthetic Surgery for Sphincter Weakness Incontinence.
- Re-operative Prosthetic Surgery for Erectile Dysfunction.

LIVE DEMONSTRATIONS
Penoscrotal penile implant technique Infrapubic penile implant technique Simultaneous Double Implant (IPP + AUS).
IPP plus Graft/Modeling/Incision Priapism (IPP Implantation).
Glanspexy.
Revisions Male Sling & AUS.

VIDEOS
Mini-invasive and no-touch techniques
Grafting procedure
Prosthetic Urology
Management of Complications

DEBATES & CLINICAL CASES
The faculty will present difficult cases for discussion.
The attendees may also bring clinical cases and controversies they would like to be discussed.

- Is there a New Paradigm for the Cause and Management of Incontinence Following Radical Prostatectomy.
- Male Urinary Incontinence - Management Options and Complications of the Artificial Urinary Sphincter.
- Penile Prosthesis & Peyronie’s Disease 2016 Update.
- New Strategies to increase patient satisfaction after IPP: Meeting patient’s expectations.
- Genital Prosthetic Surgery Market: USA & Europe, Why are so different?

LOCALLY ADVANCED & NO/M1 HORMONESENSITIVE (HS) AND HORMORESISTANT (HR) PROSTATE CANCER: QUO VADIS 2016?
High risk PC management, Failure after radical & focal therapy, New development & long-term outcomes in Hormotherapy, Chemotherapy in real life and Immunotherapy awakening and other strategies.

LECTURES
- Oligometastatic disease definition & role of radical surgery.
- Outcomes of multimodal strategies in High Risk PC.

- Overdiagnosis, overtreatment and re-treatment: What exactly means in 2016?
- How to interpret biology of localized PC: Clinical implications, heterogeneity, genomics and others.
- MRI as a screening tools for PC: “Fusion or Confusion”.
- PRAD 2.0: How to report and how to draw clinical translation.
- Prostate biopsy: To whom and how: Fusion, No-fusion (cognitive), standard.
- Active Surveillance: Long-term outcome and follow-up criteria.
- Focal Therapy: State of the Art (HIFU, CR0, Nanoknife, etc).
- Radical Treatment: Oncological & functional outcomes after 30 years perspective.
- Role of hormonal neoadjuvant regimens: Time to rethinking?
**THURSDAY SEPTEMBER 15, 2016**

**DIAGNOSIS & MANAGEMENT OF CLINICALLY LOCALIZED PROSTATE CANCER. WHERE ARE WE GOING?**

mp MRI of the Prostate, Update on reporting mpMRI findings, Fusion guided biopsy, active surveillance, focal therapy, radical surgery and others.

**LECTURES**
- Overdiagnosis, overtreatment and re-treatment: What exactly means in 2016?
- How to interpretate biology of localized PC. Clinical implications, heterogenicity, genomics and others.
- MRI as a screening tools for PC: “Fusion or Confusion”.
- PRAD 2.0: How to report and how to draw clinical translation.
- Prostate biopsy: To whom and how: Fusion, No-fusion (cognitive), standard.
- Active Surveillance: Long-term outcome and follow-up criteria.
- Focal Therapy: State of the Art (HIFU, CRIO, Nanoknife, etc).
- Radical Treatment: Oncological & functional outcomes after 30 years perspective.
- Role of hormonal neoadyuvant regiments: Time to rethinking?

**LIVE DEMONSTRATIONS**
- Fusion guided biopsy: MIM Symphony, Biopsee, Hitachi, BK Medical, Artemis, UroNav.
- Focal Therapy: Focal HIFU, Focal Cryo and Nanoknife.

**FRIDAY SEPTEMBER 16, 2016**

**SEXUAL DYSFUNCTION AFTER RADICAL PELVIC SURGERY: FROM BASIC SCIENCE TO CLINICAL PRACTICE.**
- Incidence & Prevalence
- Challenging cases-operative technique

**MALE URINARY INCONTINENCE AFTER PROSTATE CANCER TREATMENTS.**

**LECTURES**
- Re-operative Prosthetic Surgery.
- Re-operative Prosthetic Surgery for Sphincter Weakness Incontinence.
- Re-operative Prosthetic Surgery for Erectile Dysfuction.

**LIVE DEMONSTRATIONS**
- Fusion guided biopsy: MIM Symphony, Biopsee, Hitachi, BK Medical, Artemis, UroNav.
- Focal Therapy: Focal HIFU, Focal Cryo and Nanoknife.

**FRIDAY SEPTEMBER 16, 2016**

**SEXUAL DYSFUNCTION AFTER RADICAL PELVIC SURGERY: FROM BASIC SCIENCE TO CLINICAL PRACTICE.**
- Incidence & Prevalence
- Challenging cases-operative technique

**MALE URINARY INCONTINENCE AFTER PROSTATE CANCER TREATMENTS.**

**LECTURES**
- Re-operative Prosthetic Surgery.
- Re-operative Prosthetic Surgery for Sphincter Weakness Incontinence.
- Re-operative Prosthetic Surgery for Erectile Dysfuction.

**LIVE DEMONSTRATIONS**
- Fusion guided biopsy: MIM Symphony, Biopsee, Hitachi, BK Medical, Artemis, UroNav.
- Focal Therapy: Focal HIFU, Focal Cryo and Nanoknife.

**LOCALLY ADVANCED & NO/MI HORMONESENSITIVE (HS) AND HORMORESISTANT (HR) PROSTATE CANCER: QUO VADIS 2016?**

High risk PC management. Failure after radical & focal therapy. New development & long-term outcomes in Hormotherapy, Chemotherapy in real life and Immunotherapy awakening and other strategies.

**LECTURES**
- Oligometastatic disease definition & role of radical surgery.
- Outcomes of multimodal strategies in High Risk PC.

**LIVE DEMONSTRATIONS**
- Live guided biopsy: MIM Symphony, Biopsee, Hitachi, BK Medical, Artemis, UroNav.
- Focal Therapy: Focal HIFU, Focal Cryo and Nanoknife.

**DEBATES & CLINICAL CASES**
- The faculty will present difficult cases for discussion.
- The attendees may also bring clinical cases and controversies they would like to be discussed.

**LECTURES**
- Is there a New Paradigm for the Cause and Management of Incontinence Following Radical Prostatectomy.
- Male Urinary Incontinence - Management Options and Complications of the Artificial Urinary Sphincter.
- Penile Prosthesis & Peyronie´s Disease 2016 Update.
- New Strategies to increase patient satisfaction after IPP: Meeting patient’s expectations.
- Genital Prosthetic Surgery Market: USA & Europe. Why are so different?

**LIVE DEMONSTRATIONS**
- Penoscrotal penile implant technique
- Infrapubic penile implant technique
- Simultaneus Double Implant (IPP + AUS). IPP plus Graft/Modeling/Incision Priapism (IPP Implantation).
- Glanspexy.
- Revisions Male Sling & AUS.

**VIDEOS**
- Mini-invasive and no-touch techniques
- Grafting procedure
- Prosthetic Urology
- Management of Complications

**DEBATES & CLINICAL CASES**
- The faculty will present difficult cases for discussion.
- The attendees may also bring clinical cases and controversies they would like to be discussed.

**LECTURES**
- Is there a New Paradigm for the Cause and Management of Incontinence Following Radical Prostatectomy.
- Male Urinary Incontinence - Management Options and Complications of the Artificial Urinary Sphincter.
- Penile Prosthesis & Peyronie´s Disease 2016 Update.
- New Strategies to increase patient satisfaction after IPP: Meeting patient’s expectations.
- Genital Prosthetic Surgery Market: USA & Europe. Why are so different?
The Global Prostate Cancer Meeting will be organized in 4 areas of knowledge:

1. Diagnosis & Management of Clinically Localized Prostate Cancer. Where are we going?
   - mpMRI of the Prostate, Update on reporting mpMRI findings, Fusion guided biopsy, active surveillance, focal therapy, radical surgery, and others.

2. Locally Advanced & M0/M1 Hormone Sensitiv (HS) and Hormone Resistant (HR) Prostate Cancer: Quo Vadis 2016?
   - High risk PC management, Failure after radical & focal therapy, New development & long-term outcomes in Hormonotherapy, Chemotherapy in real life and Immunotherapy awakening and other strategies.

   - Incidence & Prevalence Challenging cases-operative technique.

4. Male Urinary Incontinence After Prostate Cancer Treatments.

REGISTRATION FEE:
- Before July 15, 2016: 600 € (+ 21% VAT)
- After July 15, 2016: 650 € (+ 21% VAT)

The registration fee includes: Documentation, participation in scientific events, lunches, coffees and dinner.
